RECOMMENDATION

Centre for Information Service, Co-operation and Development of NGOs – CNVOS is an umbrella network of non-governmental organizations (NGOs), which unites over 600 NGOs. When providing counseling service NGOs we often use the Administrative Consultation Wiki (“Upravna svetovalnica”) service, which is accessible via Faculty of Administration of University of Ljubljana.

We estimate Administrative Consultation Wiki service as effective and useful, since we receive answers to our questions quickly. Furthermore the answers are substantively comprehensive, intelligible and supported with case-law and legal theory.

The mentioned service is at the moment the only service in Slovenia, which enables us free of charge access to professional and above all reliable answers to legal questions in the field of Administrative Law.
